

Increasing Transparency in Your Finance Organization

Financial transparency enables internal and external stakeholders to easily understand an organization's financial position. It has become a central value proposition for many finance departments that wish to share greater insights and provide easier access to their records and data. But in order to achieve financial transparency, internal team members need to understand the value of the initiative and work collaboratively to make it happen. Leveraging a financial software can provide the additional tools and resources that finance teams need in order to execute on this vision.

HOW DEBT & LEASE MANAGEMENT SOFTWARE CAN BOOST FINANCIAL TRANSPARENCY

MORE INFORMED STAKEHOLDERS

Provide clarity and proactive information management with consistent and accurate dissemination of financial records

HOLISTIC DATA INSIGHTS

Analyze data across multiple funds and projects for a comprehensive view

INCREASED COLLABORATION

Grant stakeholders free, controlled access to your financial database

POWERFUL REPORTING

Easily standardize and generate accurate, detailed financial reports

DATA WAREHOUSE

Create a master data warehouse for all debt and lease obligations

Features and Functions that Enable Financial Transparency

SINGLE SOURCE OF TRUTH

Connect decentralized departments by inviting your entire team (and outside professionals) to work from one set of accurate, up-to-date data that is accessible anytime from anywhere in a secure, cloud-based location.

AUDIT & FINANCIAL NOTES

Reduce the time it takes to prepare for audit season. With detailed records and verification of payments and other events, you can have confidence your audits are in order and will be a breeze.

REPORT AUTOMATION

Generate exportable financial reports with the click of a button and feel confident sharing accurate, insightful data analysis with internal and external team members.

DOCUMENT REPOSITORY

Eliminate bottlenecks and store all original source documents in one centralized hub so verifying data against original documentation is readily accessible.

DATA VISUALIZATION

Provide internal users, external networks, and constituents with data visualization, charts, and other reports that take even the most complicated data and turn it into comprehensible analysis.

What are the Next Steps?

HERE'S HOW TO GET STARTED

- 1 Identify and gather a list of internal team members who can better contribute to transparency and determine how, when, and where this information will be available.
- 2 Review your current financial tools and evaluate if the platform(s) provide your organization with the functionality and resources needed to provide better transparency. If not, it may be time to search for another provider.
- 3 Alert internal and external stakeholders of the additional efforts your organization is going to take to provide increased transparency and inform them where they can receive additional information.
- 4 Be consistent. Aim to provide additional transparency into your financial standings as often as possible, whether that is annually, quarterly, month or another frequency.

Learn How DebtBook Can Help.

DebtBook is powerful, easy-to-use, cloud-based debt and lease management software for local governments, nonprofits, and similar organization. DebtBook helps teams drive efficiency, collaboration, transparency, and informed decision-making within their organizations.
